Objective

To obtain experience and real hands-on learning from mentors and managers. In the form of software engineer internships roles.

Technical Skills

C++ , Javascript , HTML/CSS , Python , Java, Linux,

Projects

Personal Website - I built my own personal website, utilizing **HTML** and **CSS**. I made the page interactive by using some CSS hover over text effects.

Post Office - I created a post office system by using **C++**. It is user interactive, you can pick your package type and your quantity for mailing.

Web Scraper - I figured out how to create a web scraper utilizing **Python**. I wanted to learn how to automate tasks using selenium.

Education

August 2018 - June 2022
Chabot College, Hayward

- I'm currently attending Chabot College where I will obtain my A.A. Degree and transfer to a University to finish my Bachelors Degree in Computer Science.

Team Treehouse

- I have over 200 hours done on Team TreeHouse. TreeHouse is a self-taught coding website, where I have gained more experience by watching their videos and doing their coding challenges

Free CodeCamp

- I have over 100 hours completed on the Javascript course. This is also a self-taught website I use when I have extra time on my hands
